

Operating Area Name: North Salmon	Operating Area #: CC7001
NFS Inventory Map #: 9913, 9914, 9923, 9924	NTS Map #: 12A8

Description of Area: This area of crown land is located in the North East portion of Forest Management District 07 near Great Burnt Lake. Is located in the Bay d'Espoir sub region and accessed via NL Hydro Upper Salmon Road. It is bound to the south west by commercial block CC07002 - Diversion and bounded on the south east by commercial block CC7009-Little River East.

Harvesting Activities: Commercial activity will include timber being manually or mechanical harvested and removed using forwarders. There may also be some non industrial commercial harvesting that closely mimics domestic harvesting. Subsequent to commercial harvesting local residents and cabin owners will be allowed to remove residual timber for personal use under domestic permits

Inventory Softwood Volume:

Inventory Hardwood Volume:

Proposed Softwood Volume: 17770 m³

Proposed Hardwood Volume: 590 m³

Difference from Inventory to Proposed Volume: %

Rationale for Difference:

Silviculture Activities: Reconnaissance surveys will be carried out on areas harvested and silviculture prescriptions will be determined once assessments have been completed

Primary Forest Access Road Construction:

New Construction - 9000m

Stream Crossings: 2

Non timber Considerations and Mitigations:

None

Operating Area Name: Diversion	Operating Area #: CC7002
NFS Inventory Map #: 9913	NTS Map #: 12A8

Description of Area: This area of crown land is located in the North East portion of Forest Management District 07 near Great Burnt Lake. It is located in the Central Barrens sub region and accessed via NL Hydro Upper Salmon Resource Road Upper Salmon. It is bound to the south by commercial block CC07003 - Domshell Ridge and to the North by commercial area CC07001 -North Salmon

Harvesting Activities: Commercial activity will include timber being manually or mechanical harvested and removed using forwarders. There may also be some non industrial commercial harvesting that closely mimics domestic harvesting. Subsequent to commercial harvesting local residents and cabin owners will be allowed to remove residual timber for personal use under domestic permits

Inventory Softwood Volume:

Inventory Hardwood Volume:

Proposed Softwood Volume: 5230 m³

Proposed Hardwood Volume: 415 m³

Difference from Inventory to Proposed Volume: %

Rationale for Difference:

Silviculture Activities: Reconnaissance surveys will be carried out on areas harvested and silviculture prescriptions will be determined once assessments have been completed

Primary Forest Access Road Construction:

There are no primary forest access road proposed for this block, wood will be harvested from existing forest access roads.

Stream Crossings: 0

Non timber Considerations and Mitigations:

None

Operating Area Name: Domshell Ridge	Operating Area #: CC7003
NFS Inventory Map #: 991, 311, 243	NTS Map #: 12A1, 12A8

Description of Area: This area of crown land is located in the North East portion of Forest Management District 07, approximately 2.0 km north of Cold Spring Canal. It is located in the Central Barrens sub region and accessed via NL Hydro's road North Salmon. It is bound to the south by commercial block CC07004 – Cold Spring Pond and to the north by CC07002 – Diversion

Harvesting Activities: Commercial activity will include timber being manually or mechanical harvested and removed using forwarders. There may also be some non industrial commercial harvesting that closely mimics domestic harvesting. Subsequent to commercial harvesting local residents and cabin owners will be allowed to remove residual timber for personal use under domestic permits
