

Water Resource Management Plan for Birchy Bay Quarry
L & E Trucking and Excavation LTD.
20 Main Street
Stoneville, NL
A0G 4C0

File Number: 7111758

Reg: 2260

1. Please see attached map for project footprint area.
2. There is no streams or water bodies located inside the project footprint area.
3. N/A
4. This has been an existing quarry for numerous years and there has never been any buildup of water in the area for as long as the quarry has been there.
5. There is no runoff or on-site drainage water at any time in this area.
6. N/A
7. N/A
8. Runoff or onsite drainage water has never been known in this area, but if needed the preventive measures that will be taken to prevent land erosion from runoff, on-site drainage water, and/or dewatering, will be keeping the face of the quarry on a slope so that it reduces the risk of landslides and decreases the steepness. There can also, be ditches and berms constructed to keep the run-off under control. This has been an existing quarry for many years and has never needed any of these measures to keep water out.
