June 22, 2010

## **Environmental Assessment Bulletin**

The Honourable Charlene Johnson, Minister of Environment and Conservation, has announced the following events relative to Part 10 Environmental Assessment of the Environmental Protection Act.

### **UNDERTAKINGS REGISTERED:**

#### **5 Wing Labrador Practice Training Area Landing Strip** (Reg. 1516) **Proponent: Department of National Defence**

The proponent proposes the construction and operation of a gravel/sand austere landing strip at the Practice Training Area (PTA) located in central Labrador. The proposed location of the airstrip currently contains a mock runway and is approximately 17 kilometres southwest of Minipi Lake. The airstrip will be 75-100 feet wide to allow medium transport aircraft to land and take off and will include a turn around area for loading/off-loading transport aircraft, while simultaneously allowing another aircraft to land or take-off. The landing strip will be used for transporting bomb scrap back from the PTA, used to satisfy the growing requirements for both air and ground force training in the region and used for the practice of soft surface take-off/landing operations. Construction is tentatively scheduled to begin in the summer/fall 2010.

The undertaking was registered on June 17, 2010; the deadline for public comments is July 27, 2010; and the minister's decision is due by August 1, 2010.

#### **Bay St. George Land-Based Seismic Exploration Program** (Reg. 1515) **Proponent: Vulcan Minerals Inc.**

The proposal involves 140 kilometres of land-based seismic data acquisition in the Bay St. George area. The project will proceed in three phases: drilling; line cutting; and recording. The project involves the cutting of approximately 114 kilometres of new hand-cut trails (roughly 2.75 metres in width). Every 100 metres along these lines, a 10 metre deep hole will be formed using drills and small (2 kilogram) dynamite charges will be buried. Seismic data will then be acquired by generating sound waves at the surface and recording the echoes that return. Cutting of the trails will take approximately six weeks and drilling is expected to take approximately one month. The drilling and line cutting phases will likely overlap by 3 to 4 weeks. Recording is also estimated to take approximately one month, depending on weather conditions. The project is scheduled to commence in July 2010, subject to approval.

The undertaking was registered on June 15, 2010; public comments are due by July 22, 2010; and the minister's decision is due by July 30, 2010.

**Pinchgut Lake Cabin Area Electrical Distribution Line**  
**Proponent: Newfoundland Power Inc.**

(Reg.1514)

The proponent proposes to construct a 7,200 volt wood pole distribution line to provide electrical service to a cabin area located on the west side of Pinchgut Lake, west of Corner Brook, in the area known as the Girl Guide Camp Area. The new distribution line will be approximately 1416 metres in length, and the proposed distribution corridor will be 5.4 metres in width with a single CCA-treated wood pole configuration located along the corridor centre line. Brush clearing and surveying are scheduled for July 2010, and pole installation is scheduled for August 2010.

The undertaking was registered on June 15, 2010; public comments are due by July 22, 2010; and the minister's decision is due by July 30, 2010.

**UNDERTAKING RELEASED:**

**Peter's River, Botwood Quarry**  
**Proponent: Humber Valley Aggregates and Asphalt Ltd.**

(Reg. 1478)
