

**Additional Information:**

On an annual basis, a 15,000 breeder female mink farm would produce approximately 75,000 kits. This figure is based on an average of 4/5 kits per litter.

A projected maximum waste production for a 15,000 female breeder mink farm is as follows:

Manure – 2,700 tonnes

Shavings/straw – 375 tonnes

Carcasses – 75 tonnes

Please note these figures are approximates.
