Dear Madam/Sir:

Please find enclosed the required information for registration with your department.

D & M Services Ltd., through and in consultation with Department of Mines and Energy, has made application for 2 ha extension for our current quarry (File No. 7114418, Permit No. 121074), which is located 8 km West of Musgrave Harbour. The area has facilitated quarry work for many years and is one of the few good sources of material in our locale. Application is being made simply because favourable material within our current quarry is becoming exhausted.

Without an extension in this area, we and others accommodated through sub-ordinate permits, would have to look to opening up other new areas, which in probability would be more of an impact to the environment.

Further to our application with Department of Mines and Energy, it is our understanding that all other approvals from the required Departments or concerned authorities have been granted.

Sincerely,

D & M Services Ltd.

Dwight Abbott
