## GEOCHEMISTRY / GEOPHYSICS

1. **P.H. Davenport, L.W. Nolan, R.W. Wardle, G.J. Stapleton and G.J. Kilfoil** Digital geoscience atlas of Labrador . . . . . 1
2. **J.W. McConnell** Results of geochemical mapping employing high-density lake-sediment and water sampling in central Labrador . . . . . 17

## REGIONAL GEOLOGY–LABRADOR

3. **C.F. Gower** Geology of the Crooks Lake map region, Grenville Province, eastern Labrador . . . . . 41
4. **D.T. James and B. Lawlor** Geology of the Grenville Province, Kenamu River area (NTS 13C/NE), southern Labrador: Preliminary observations of Labradorian and Pre-Labradorian(?) intrusions . . . . . 59

## GEOGRAPHIC INFORMATION SYSTEMS

5. **S.P. Colman-Sadd** *GeoSymbol*: A database system for managing structural symbols in a Geographic Information System . . . . . 71

## TERRAIN SCIENCES

6. **M. Batterson, D.G.E. Liverman, J. Ryan and D. Taylor** The assessment of geological hazards and disasters in Newfoundland: An update . . . . . 95
7. **T. Bell, K. Sheppard and D.G.E. Liverman** Stratigraphy and age of Quaternary sediments exposed along the coast of southern St. George's Bay . . . . . 125
8. **D.G.E. Liverman, K. Sheppard and D. Taylor** Surficial geology of the St. Fintan's, Little Friars Cove and Flat Bay map areas (NTS 12B/2, 12B/3 and 12B/7) . . . . . 139
9. **M.J. Ricketts** Surficial aggregate mapping in the Holyrood (NTS 1N/6) and Bay Bulls (NTS 1N/7) map areas . . . . . 149

## MINERAL DEPOSITS

10. **D.T.W. Evans** Epigenetic gold mineralization, Baie Verte Peninsula, Newfoundland . . . . . 163
11. **J. Hinchey, A. Kerr and D. Wilton** Magmatic sulphide–oxide mineralization in the Nain Hill area (NTS 14C/12), northern Labrador . . . . . 183
12. **A. Howse and B. Way** Talc and silica investigations in the northern Baie Verte Peninsula and Whites River area . . . . . 195
13. **A. Kerr** The Powderhorn Lake Ni–Cu showings and the potential for magmatic sulphide mineralization in central Newfoundland . . . . . 205

|     |                                                                      |                                                                                                                                                                                   |     |
|-----|----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 14. | <b>A. Kerr</b>                                                       | Mafic rocks of the Pants Lake intrusion and related Ni–Cu–Co mineralization in north–central Labrador . . . . .                                                                   | 215 |
| 15. | <b>J. Mills, S.J. O'Brien, B. Dubé, R. Mason and C.F. O'Driscoll</b> | The Steep Nap Prospect: A low-sulphidation, gold-bearing epithermal vein system of late Neoproterozoic age, Avalon Zone, Newfoundland Appalachians . . . . .                      | 255 |
| 16. | <b>S.J. O'Brien, B. Dubé and C.F. O'Driscoll</b>                     | High-sulphidation, epithermal-style hydrothermal systems in late Neoproterozoic Avalonian rocks on the Burin Peninsula, Newfoundland: Implications for gold exploration . . . . . | 275 |
| 17. | <b>S.J. Piercey and D.H.C. Wilton</b>                                | Sulphide petrology and mineralization of the OKG Ni–Cu–Co sulphide prospect, Umiakoviarsek Lake region, Labrador . . . . .                                                        | 297 |

#### REGIONAL GEOLOGY–NEWFOUNDLAND

|     |                     |                                                                                                                               |     |
|-----|---------------------|-------------------------------------------------------------------------------------------------------------------------------|-----|
