### Divers Pond - Pb-Zn-Ag

Map 2 : Claims Location and Geology

**Geology Source:**  
Crisby-Whittle, L. V. J. (compiler): 2012: Bedrock geology dataset for the Island of Newfoundland. Newfoundland and Labrador Department of Natural Resources, Geological Survey, Open File NFLD/2616 version 7.0.  
**Mineral Occurrence Source:** Mineral Occurrence Database - Geological Survey, Department of Natural Resources Website: <http://www.gov.nl.ca/mines/en/geosurvey>

The **Divers Pond Property** located approximately 35 km north of Bishops Falls on the Trans Canada Highway and 2 km west of a paved road, Highway 350, which connects the TCH at Bishop's Falls to Point Leamington (Maps 1 and 2) (NTS 2E/06).

#### Regional Geology

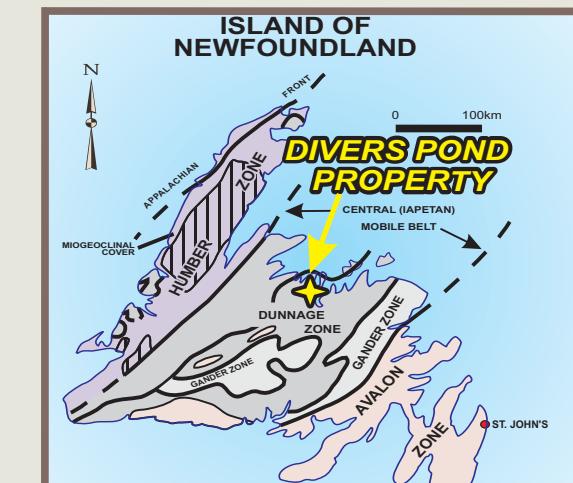

The Property lies within the structurally complex, northeastern Exploits subzone (Dunnage Zone) of central Newfoundland. The property is underlain by the early to mid-Ordovician Exploits Group.

#### Local Geology

#### Previous Work and Mineralization

Recent exploration by the present owner has led to the discovery of mineralization in rocks of the Charles Cove member, New Bay Formation. Grab samples returned 4.5% Pb, 1.03% Zn and 77 g/t Ag.

#### Exploration Model
