## **Blended Capitation Family Physicians ONLY – Alternating Biweekly Capitation payments:**

Biweekly capitation payments are based on the number of days available for processing. As such, if there is a holiday during the pay period that results in a delayed MCP Processing for cutoff dates then the biweekly capitation payment for that and the following pay period will be based on the number of days available for processing. Pay periods with fewer days available for consideration will have an adjacent pay period that accounts for the day(s) that were outside the view of the prior processing period. In a pay period with multiple holidays (e.g., late December), the variance may be greater. This is a result of capitation payments being calculated daily with multiple potential change factors (e.g. a patient rostering or de-rostering event, patient birthday changing the age modifier, etc.) affecting each physician's capitation payment for any given day.

The days of capitation payment per pay period is as follows:
