

## Immunization Schedule Newfoundland and Labrador

**Table 1: Routine Immunization Schedule for Children Beginning Series in Early Infancy**

Age	Vaccine
2 months	DTaP-IPV-Hib, Pneumococcal conjugate vaccine* and Rot-1**
4 months	DTaP-IPV-Hib, Pneumococcal conjugate vaccine* and Rot-1**
6 months*	DTaP-IPV-Hib
6 months and older***	Influenza and COVID-19 vaccine (fall/winter season)
12 months	Pneumococcal conjugate vaccine, MMRV and Men-C
18 months	DTaP-IPV-Hib and MMRV
4-6 years	DTaP-IPV or Tdap-IPV

\* Children at high risk for disease should receive Pneu-C-20, including an additional dose at 6 months. Children not at high risk should receive Pneu-C-15.

\*\* **Do not give as injection.** Rotavirus vaccine is an oral vaccine.

\*\*\* All children 6 months & older can receive influenza and/or COVID-19 vaccine, based on eligibility criteria

**Table 2: Routine Immunization Schedule as part of the School Health Program:**

Grade	Vaccine
Grade 4	Men-C-ACYW-135
Grade 6	HB and HPV-9
Grade 8 and 9	Tdap

DTaP-IPV-Hib:	diphtheria, tetanus, acellular pertussis, polio and Haemophilus influenza b
DTaP-IPV:	diphtheria, tetanus, acellular pertussis and polio
HB:	hepatitis B (2-dose schedule offered 6 months apart)
HPV-9:	9 strains of human papillomavirus (2-dose schedule offered 6 months apart)
Men-C:	type C meningococcal disease conjugated vaccine
Men-C-ACYW-135:	type A, C, Y, and W135 meningococcal disease conjugated vaccine
MMRV:	measles, mumps, rubella, and varicella
Pneumococcal:	15 or 20 strains of pneumococcal disease conjugated vaccine (based on risk)
Rot-1:	oral, monovalent rotavirus vaccine
Tdap:	tetanus, diphtheria and acellular pertussis, offered to adolescents/adults

For delayed schedules or for more information please see the [Provincial Immunization Manual](#) or contact public health within your regional health authority.
