

Labrador

Population and Labour Market Overview

(Census Divisions 10 & 11)

March 2024

Definitions and Notes

- *Note that the profile for Labrador includes the combined data for Census Divisions 10 and 11, unless otherwise specified. Please see the map on the last page to review these boundaries.*
- **Page 3, 4:** Prior to the 2021 Census, the **Men+** category referred to males. Starting in 2021, this category includes men and boys, as well as some non-binary persons. Likewise, prior to the 2021 Census, the **Women+** category referred to females whereas, starting in 2021, this category includes women and girls, as well as some non-binary persons.
- **Page 3, 5:** Due to substantial changes in the National Occupational Classification System (NOC) between the 2016 and 2021 censuses, NOC comparisons between the two latest census years are not possible.
- **Page 4:** The Indigenous Identity category includes persons who identify as First Nations (North American Indian), Métis and/or Inuk (Inuit) and/or those who report being Registered or Treaty Indians (that is, registered under the Indian Act of Canada), and/or those who report having membership in a First Nation or Indian band. Note that the earlier term 'Aboriginal' used in the 2016 census has been replaced with this updated term of '**Indigenous**' when referring to individuals who identify themselves as First Nations people, Métis and/or Inuit.
- **Page 5:** Income data includes data based on the number of weeks in which a person aged 15 years and over worked for pay or in self-employment in 2020 at all jobs held, even if only for a few hours, and regardless of whether these weeks were mostly full time (30 hours or more per week) or mostly part time (less than 30 hours per week). All income data, regardless of income source, is based on income in the reference year 2020. All other data pertaining to labour force and employment in this profile refers to such status in the reference week of each Census year (i.e., the reference week in May 2016 and May 2021, as applicable)
- **Page 9: 'Immigrant'** refers to a person who is, or who has ever been, a landed immigrant or permanent resident. Such a person has been granted the right to live in Canada permanently by immigration authorities. Immigrants who have obtained Canadian citizenship by naturalization are included in this group. In the 2021 Census of Population, 'Immigrant' includes immigrants who were admitted to Canada on or prior to May 11, 2021.
- **Page 9:** Data on mobility status refers to the status of a person with regard to their place of residence on Census Day (May 11, 2021) in relation to their place of residence on the same date 5 years earlier. Persons who, on Census Day, lived in the same residence as they did on the same date 5 years earlier are referred to as **non-movers**, and persons who, on Census Day, did not live in the same residence as they did 5 years earlier are referred to as **movers**. Movers include **non-migrants** and **migrants**. Non-migrants are movers who lived in the same census subdivision on Census Day as they did on the same date 5 years earlier. Migrants include **internal migrants** and **external migrants**. Internal migrants refers to migrants who lived in Canada 5 years ago. This includes persons who moved to a different city, town, township, village, municipality or Indian reserve within Canada. Greater detail can be provided for internal migrants by identifying whether they crossed a provincial boundary (**interprovincial migrants**) or the limits of a large municipality, specifically a census metropolitan area (CMA) or census agglomeration (CA) within a province (**intraprovincial migrants**). **External migrants** refers to migrants who did not live in Canada 5 years ago.

Highlights from Census 2021 – Labrador

POPULATION: 26,650

**MEDIAN AGE: NUNATSIAVUT Division 11 - 32.8
LABRADOR Division 10 - 39.2**
