Transportation & Infrastructure	Other	6(a)(iv) Emergency or situation of urgency	For the purchase of four ISAT-200A Transceiver's for CL-415 Water Bomber fleet to replace current parts that have become obsolete causing issues with connectivity and data transfer for the tracking system (unable to view aircraft on tracking system). Past history has led to extended downtime for the aircraft as this part takes time to be received and is required to track the aircraft while it is in flight. This could lead to public safety issues during a busy forest fire season as with no tracking system we would be unable to ensure safety during flight when multiple aircraft are in the air fighting fires. This will be even more crucial when the aircrafts are out of province for fire suppression duties.	Skytrac Systems Ltd	Kelowna	BC	\$87,600.00 USD	224006685	17-May-24	One time purchase	N/A
