

CIRCULAR

To: All Municipalities and Local Service Districts, Inuit Community Governments, and Consultants
Re: Changes to MI Master Construction Specifications
Date: July 9, 2025

This Circular aims to highlight a change in the way that Municipal Infrastructure receives feedback for the Municipal Water, Sewer, and Roads Master Construction Specifications ("the Master Spec").

MI edits the Master Spec to address technical updates, industry norms, and keep in line with procedural requirements. In the past, MI has taken in feedback from industry in the fall, with changes to the Master Spec published the following winter.

Over recent months, MI has made proposed edits to the Master Spec and has reorganized sections to further increase clarity. Recognizing that funding recipients prepare the next year's bidding opportunities over the winter months; MI has published draft specification changes online for review and feedback at the link below. If you are interested in providing feedback on any of the proposed changes, please follow the instructions on the webpage.

<https://www.gov.nl.ca/ti/mi/mwsr/mwsrspecfeedback/>

MI will accept feedback on these proposed changes **until October 1, 2025**. MI will publish the revised Master Spec in **November 2025**.

If you have any other questions related to this, feel free to reach out to your local Regional Office.

Sincerely,

Kim Kieley, P. Eng., FEC
Director – Municipal Infrastructure
Transportation and Infrastructure
